

CORD CONNECTED 120VAC

ITW Linx's line of SurgeGate™ AC power surge protectors offers superior surge protection against both over-voltage and under-voltage surge events, with an industry-leading 1-5 nanosecond response time. Our patented SurgeGate™ Plus circuitry design ensures power is disconnected to your equipment during a surge event, and automatically reconnects it once power has returned to a safe voltage level. These AC surge protectors come equipped with LED indicator lights that let you know the unit is operational. They family is available between 4 and 8 outlets, with optional DSL and telephone line protection. Each unit is mountable with right angle plugs for added space savings and offers a 5-year product warranty and connected equipment warranty of \$50,000. Can be used with all SurgeGate Modular Communication Protectors and SurgeGate Telco Surge Protection.

Models:

M8KSU

M4KSU

GRM0600

AC (HARDWIRED) SURGE PROTECTION DEVICES

Protect AC powered equipment, systems and networks from the destructive forces of surges. Utilizing the ITW Linx® state of the art surge protection devices, results in reliable operations and sustainable networks. The Single Phase and Three Phase models are now Linx product offerings.

Single Phase Models:

AHW120/240-25-H1

AHW120/240-100

AHW120/240-80

AHW120-80

Three Phase Models:

AHW208/120-100

AHW220/127-100

AHW240/120D-100

AHW480/277-100

AHW480-100
