

MADE IN AMERICA

ELECTRICIAN'S ESSENTIALS

To our valued distributor partners:

We'd like to reassure you that you can continue to rely on Klein Tools during these difficult times. While millions of Americans are forced to take shelter, Klein Tools understands that you and your customers are necessary for the operations and maintenance of critical-infrastructure sectors, including electrical, residential and commercial construction, energy, telecommunications and many others. Klein Tools stands with our customers, your customers, and other "Essential Businesses". We intend to keep you well supplied so that you can keep our nation running.

Klein Tools has been manufacturing tools in the United States since 1857. Today, our American workers are manufacturing what American tradespeople need to keep working. We are extremely proud to be an American manufacturer with nine facilities in seven states. We are equally proud of all of our employees who have risen to the challenge and adapted tremendously, allowing us to keep our business open to support our country.

As the #1 choice of professional electricians in the United States, we are committed to being a consistent, reliable supplier of the essential tools that professional tradespeople need. And we're here to assure you that our tools are ready to ship to your stores now.
